

GGY, the developer of the AXIS system, is looking for enthusiastic individuals interested in joining our Customer Support Team. This team deals directly with our clients on a daily basis to provide actuarial support and training. The team also provides documentation for clients; tests new versions of the system; and works on research projects that provide exposure to state of the art actuarial science and its application to real problems.

You will possess strong interpersonal, communication, presentation and analytical skills and will have at least 5 years of experience in the life insurance industry in Canada or the U.S. You should have experience in life, annuity or health in the areas of pricing, corporate, ALM or stochastic modeling work. Some of the client training is outside of Toronto so you should be willing to travel. Preference will be given to those with ALM and/or U.S. experience.

If you want to use and improve your actuarial skills in a high-tech, fast-paced, client-driven environment and enjoy helping people and learning new things every day, this position will be of interest to you.

GGY is conveniently located in Toronto and we offer excellent remuneration, a competitive benefits package including flexible hours and a casual dress code. Please forward your résumé in confidence to Bill Young at [bill.young@ggy.com](mailto:bill.young@ggy.com). Thank you.
